

Date	7 November 2022
Team ID	PNT2022TMID15746
Project Name	IOT Based Smart Crop Protection System for Agriculture
Maximum Marks	4 Marks

STEPS:

1. Firstly create an IBM cloud account with IBM ID and password.

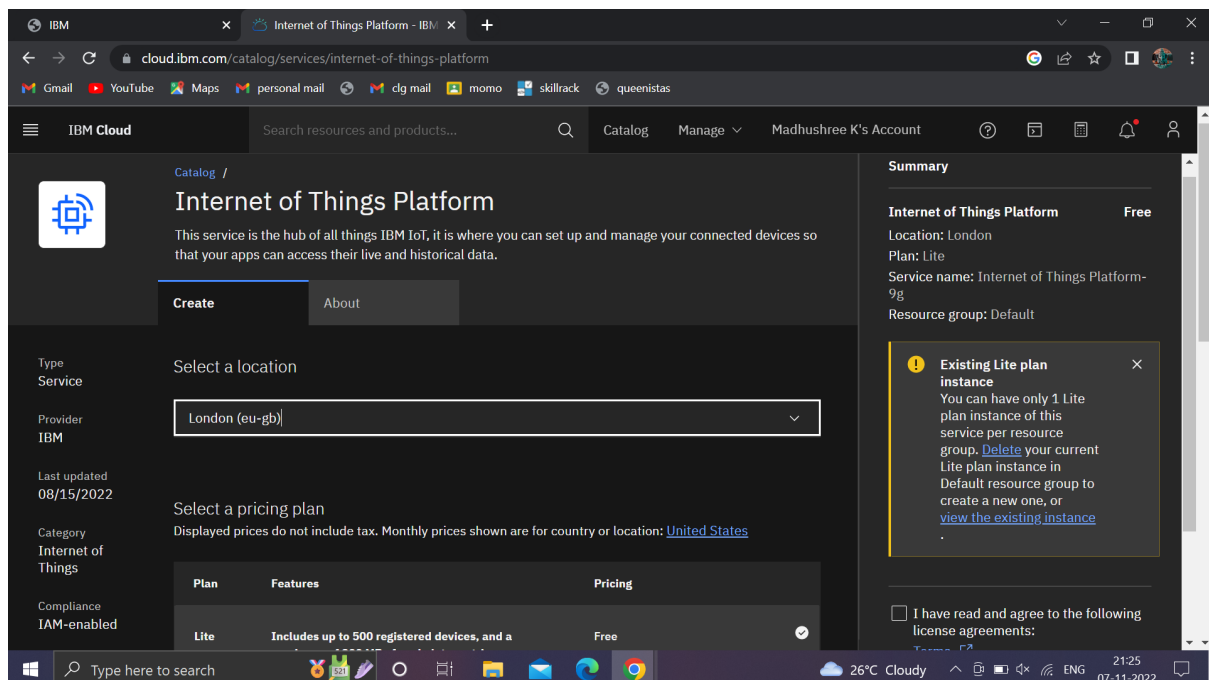

2. Home page of IBM cloud

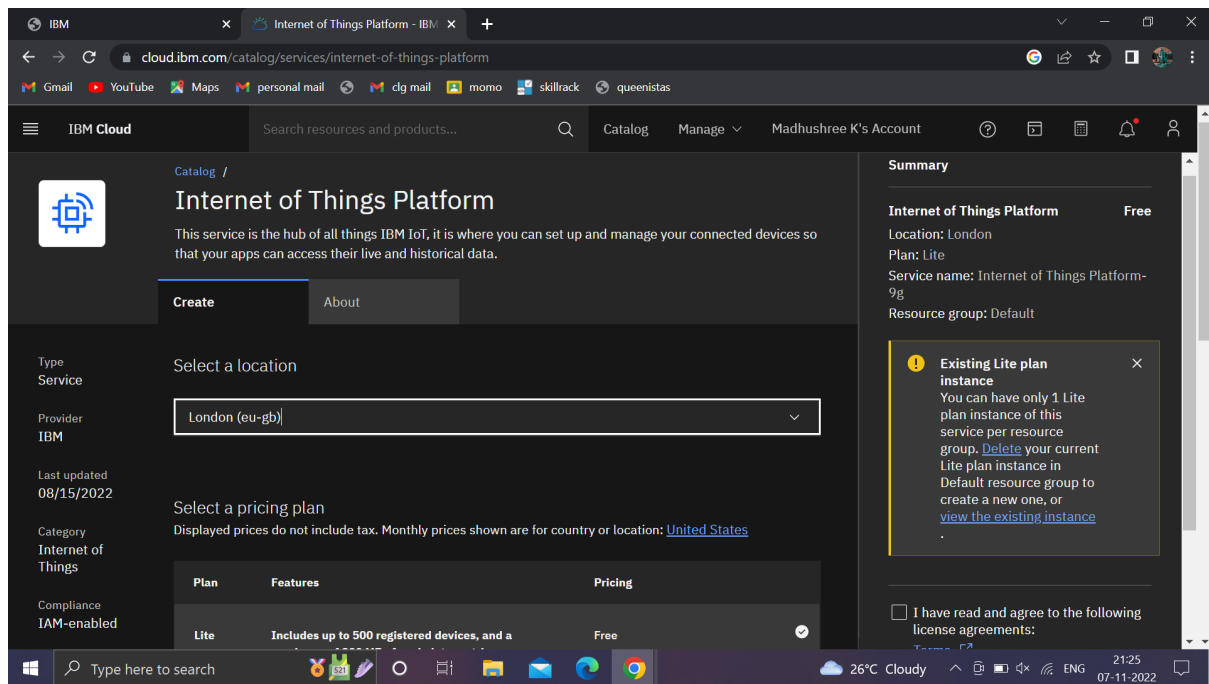

3. Click on the catalog on the top.

4. Click on the IOT in the category mentioned.

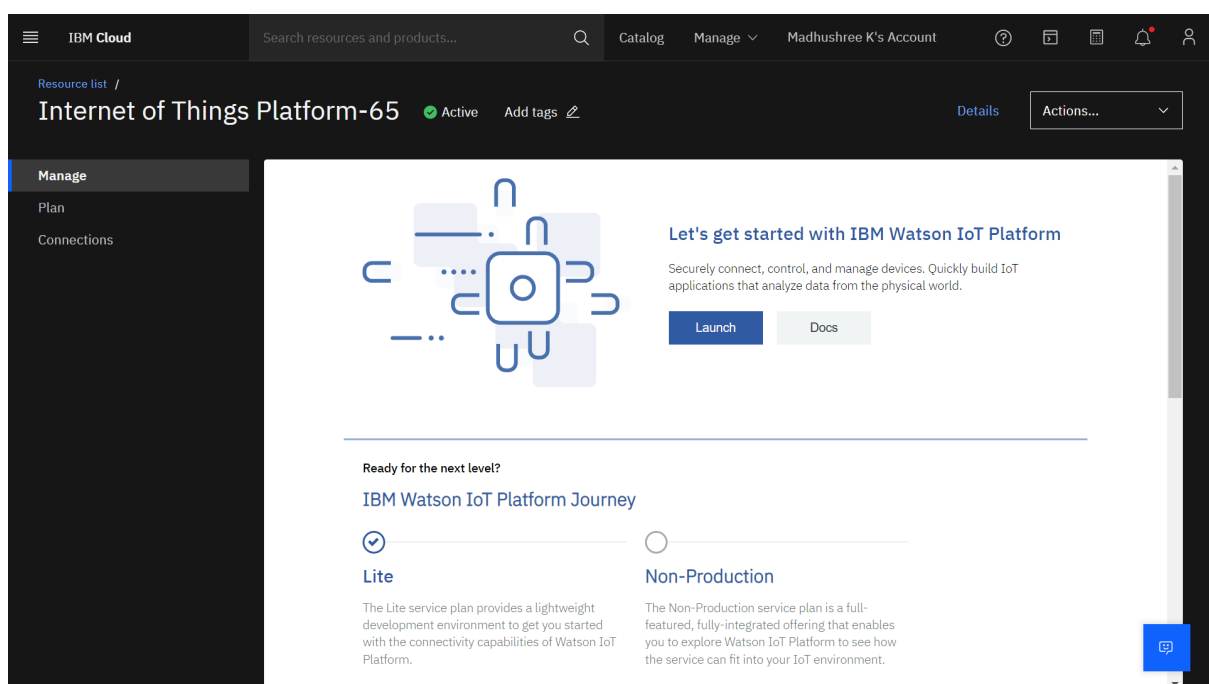

5. If already a lite is present delete it else u can't create another

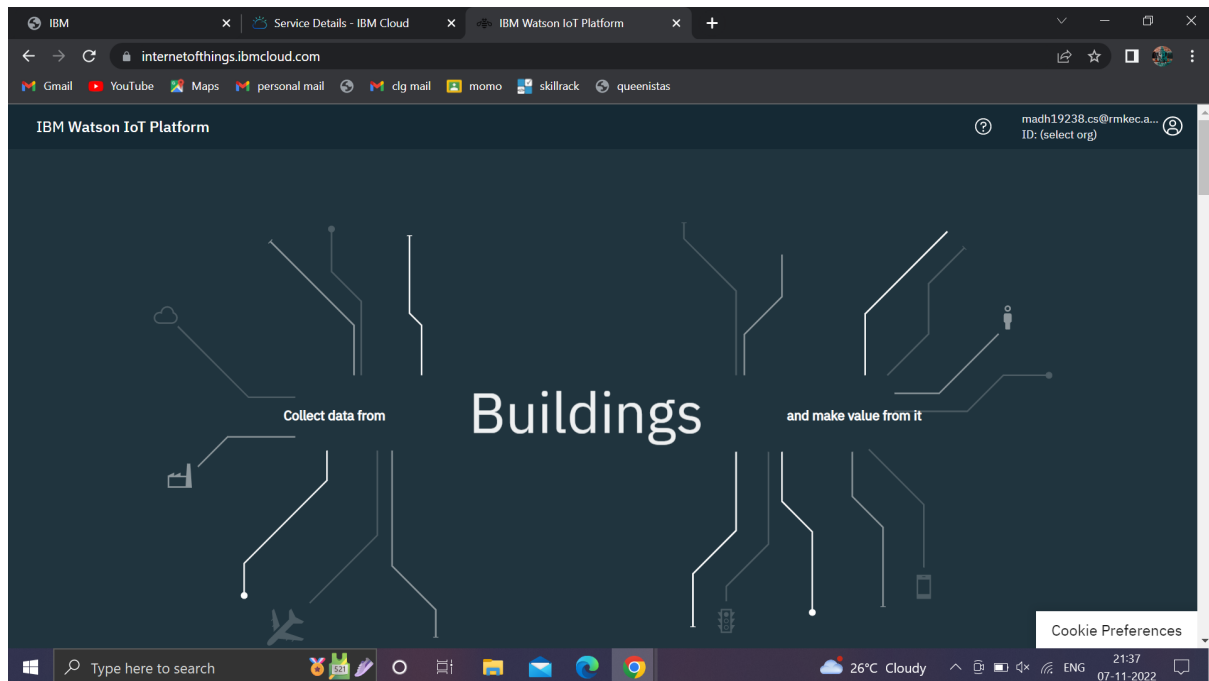

6. Enter the location and in the configure your resources type the service name and choose the plan, tick the agree with it agreements and then click on create.

7. Internet of things platform smart crop protection will be created, where there are different options like manage, plan, and connection.

8. Clicking on the launch button in the manage tab, it will open to this.

9. Enter the details to sign in to the Watson cloud to create a device.

10. Once logged in the name will be displayed and it goes back to the first page.

11. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

12. The member tab is add the teams members to work in the platform

13. Click on the device tab and click on the add device button, then give the device type and device id and click next.

14. Clicking next it goes to the security where we do authentication token ID.

15. Clicking on the next it goes to the summary of the device then click finish.

16. The device credentials will be displayed with all details.

17. Clicking on the device tab we can now see the added device. Clicking on it will display the order the other details.

It has different the like identity, device information, state and login.

The screenshot displays the IBM Watson IoT Platform interface. At the top, the browser address bar shows the URL `xgd3etinternetofthings.ibmcloud.com/dashboard/devices/browse`. The page header includes the IBM logo and the text "Service Details - IBM Cloud" and "IBM Watson IoT Platform". The user's profile is shown as "madh19238.cs@rmkec.ac.in" with ID "xgd3et".

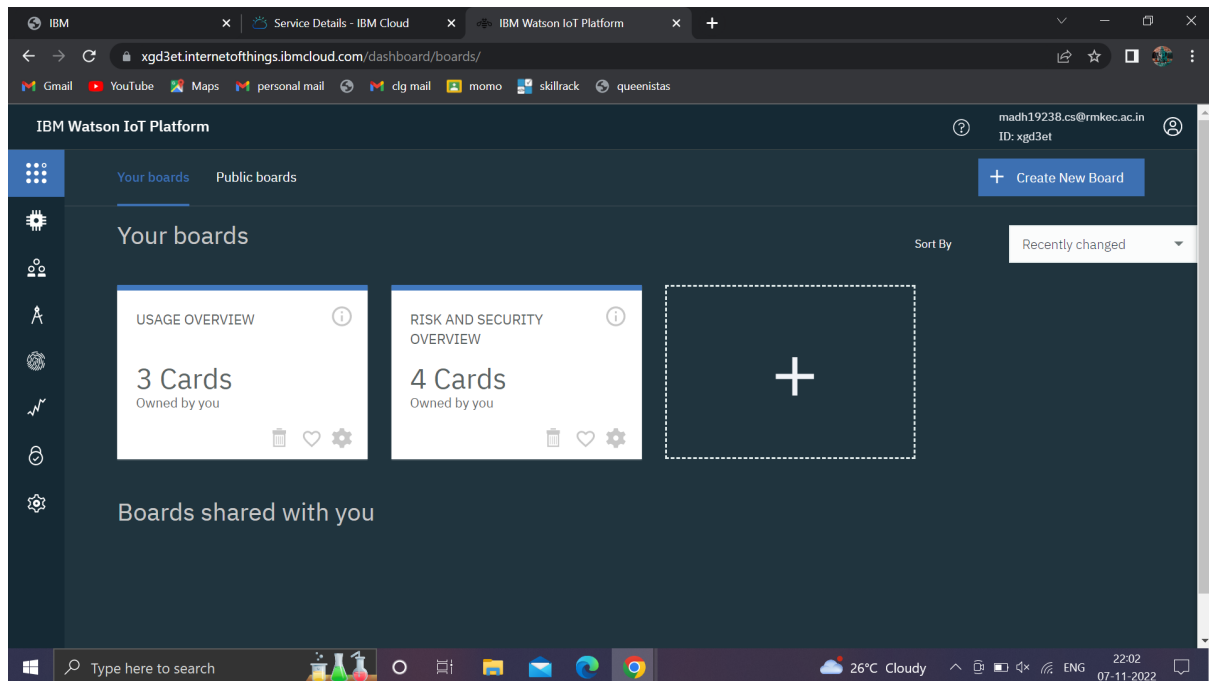

The main content area is titled "Browse" and contains a table of devices. The table has columns for "Device ID", "Status", "Device Type", "Class ID", and "Date Added". A single device is listed with ID "123456", Status "Disconnected", Device Type "NodeMCU", Class ID "Device", and Date Added "Nov 7, 2022 10:01 PM".

Below the table, a detailed view of the selected device is shown. It includes tabs for "Identity", "Device Information", "Recent Events", "State", and "Logs". The "Identity" tab is active, displaying the following information:

Property	Value
Device ID	123456
Device Type	NodeMCU
Date Added	Nov 7, 2022 10:01 PM
Added By	madh19238.cs@rmkec.ac.in
Connection Status	Disconnected

At the bottom of the page, there is a footer with the text "Items per page 50" and "1 of 1 page". The Windows taskbar is visible at the very bottom, showing the time as 22:02 on 07-11-2022.

18. The Boards will display card for the project.

RESULT:

An IBM Watson cloud for IOT and device is created.
